

# SAFE AND STABLE HOMES

Your gift helps us continue creating safe and stable homes for those in our community. Juanita's mobility deteriorated over the years, making her beloved home an obstacle course. Living in a house over 60 years old, her bathroom was especially hazardous. It featured an old clawfoot tub and a small makeshift shower, rendering it nearly impossible for her to use. The small bathroom could not accommodate her needs, and each day became a struggle against the limitations of her environment. Recognizing the urgent need for a safer living space, United Way Community Partner Rebuilding Hope embarked on a mission to transform Juanita's bathroom. The team enlarged the bathroom to accommodate a handicapped-accessible shower. The deteriorating plumbing also needed replacement and the rotted floors required repair. This was not just a renovation but a necessary intervention to restore Juanita's independence. The project was a resounding success. The transformation improved her quality of life. Stories like Juanita's highlight the profound impact of our work. With your generous support, we can continue to bring safety, comfort, and stability to those in need.

**UNITED, WE CAN CREATE MORE SAFE AND STABLE HOMES.**
